

December 2004,

Dear Reader,

Welcome to this month's update. As part of our commitment to provide the most advanced and the most user-friendly eProcurement application, we have introduced different levels of services based on your feedback. What this means to you, as a potential customer, is greater flexibility and choice of applications to suit your organisational requirements and timescale.

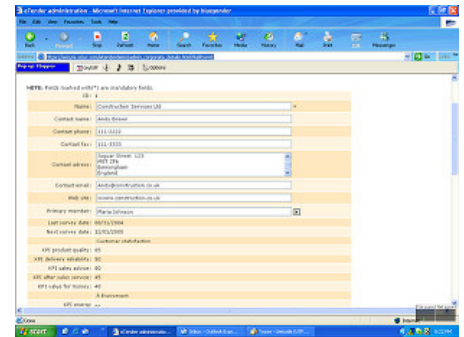

Demo web site address:
<https://secure.sciux.com/etenderdemo>
 username: trial
 password: fjdksl753

1 Highly flexible, pre-award contract transaction service application which allows Client:

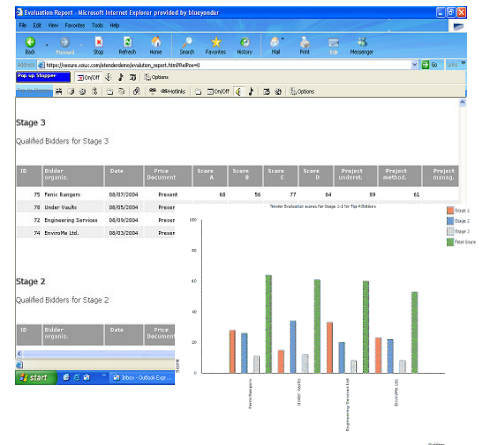

- to post new tenders
- to receive bids
- to evaluate the received bids
- to send notifications to the bidders

This package allows quick and efficient way of dealing with a large number of tenders hence getting better Value for Money in terms of procurement costs and the actual received tender prices.

2 Once the tender has been awarded, post - award transaction management allows Clients:

- to control projects in progress
- to set - up a contract program
- to control / approve payments
- to send notifications for payment once approved
- to utilise Earned Value Analysis throughout the process and monitor progress at every stage of the project.

3 My Project combines both My Tender and My Manager offering a complete solution known as eSourcing

For more information:

- running a live demonstration
- running a pilot scheme
- setting up the service
